

contig_11 (74,025 bp) — putative conjugative element of *Virgibacillus salarius* PL25
 99 CDS from independent Prokka annotation • mobile-element genes confirmed by HMM scan

HMM hits at $E \leq 1e-5$ (extended ICE panel: 21 Pfam profiles). PL25_00076 (Rep/Relaxase?) is too divergent for any local Pfam HMM — IBEX BLAST vs nr will resolve identity.
