

PL25 contig_11 — 74,025 bp closed circular plasmid carrying PL25_M23

Flye-confirmed circularity (assembly_info.txt: circ=Y; mean cov ≈ 889x; Nanopore + Flye v2.9+)

Tracks (outer → inner: CDS forward, CDS reverse, coverage, GC %, GC skew)

- | | | |
|---------------------------------------|------------------------------|-------------------------|
| PL25_00078 M23 peptidase (this study) | PL25_00094 AAA ATPase | GC content (below mean) |
| PL25_00076 Replication-Relaxation | PL25_00148 T4SS-DNA transfer | GC skew positive |
| PL25_00077 RusA resolvase | Other CDS | GC skew negative |
| PL25_00082 VirB4-like ATPase | GC content (above mean) | |
