

PL25 M23 metallopeptidase — AlphaFold2 structure prediction

Mature form (333 aa), mean pLDDT = 88.7 • Pfam M23 (PF01551) confirmed • Canonical Zn^{2+} active-site geometry (HxxxD + HxH motifs)

A — Full structure (front)

B — 90° rotation

Two-domain architecture: N-terminal accessory + M23 catalytic

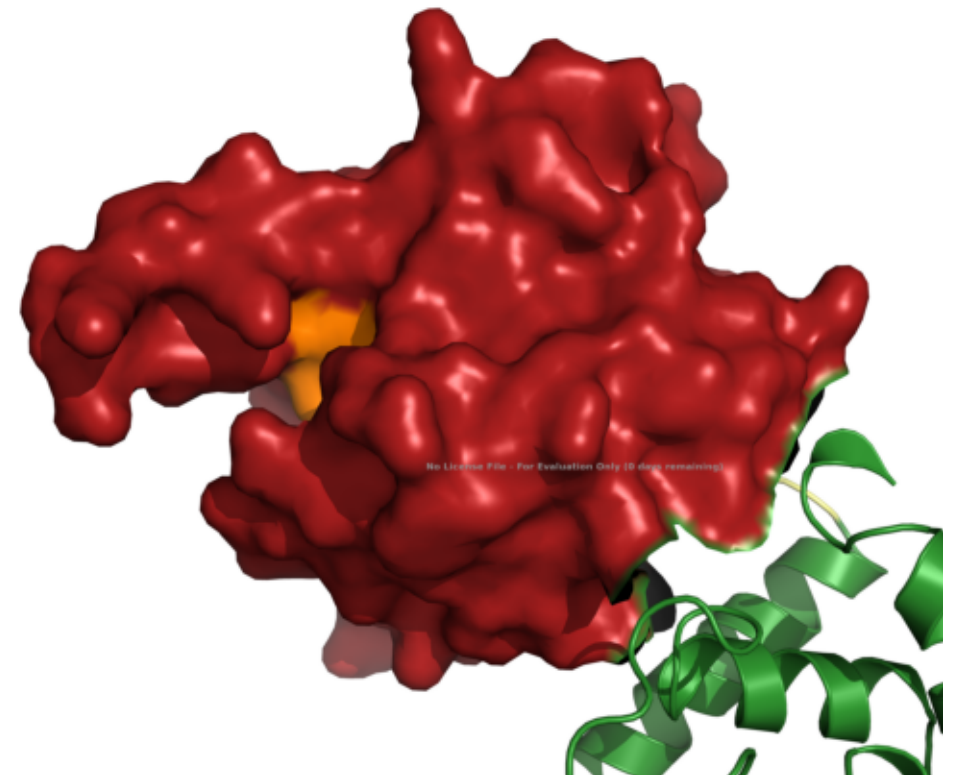

C — Active site close-up

Zn^{2+} -coordinating His/Asp residues — HxxxD + HxH motifs

Side view showing β -barrel of M23 domain

D — Catalytic groove

Substrate-binding cleft of M23 catalytic domain
