

Mobile genetic element architecture — *V. salarius* PL25 contig_11 conjugative plasmid

A — *Virgibacillus salarius* PL25 contig_11 (74,025 bp) — 99 CDS, conjugative plasmid

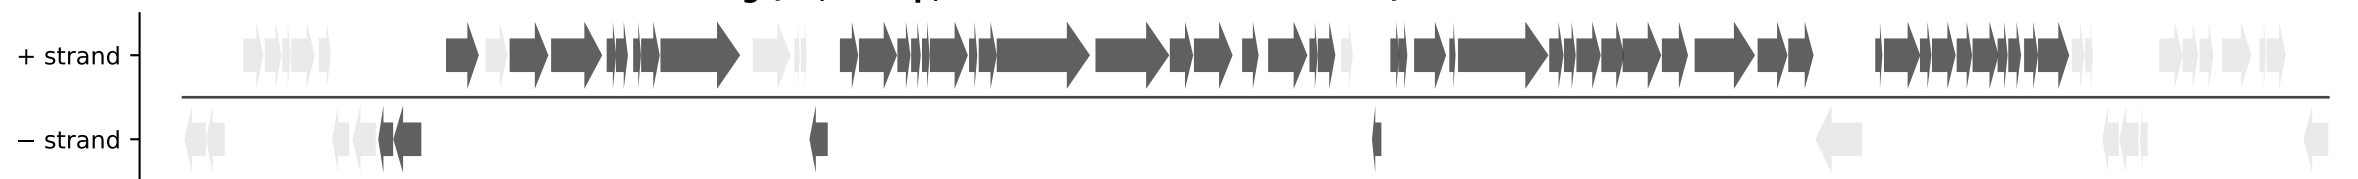

B — GC deviation from chromosome (HGT signature)

C — Synteny: PL25 contig_11 ↔ *O. contaminans* (closest characterised relative) • 52 orthologous ribbons

D — *Ornithinibacillus contaminans* contig (60,767 bp; rescaled to PL25 coordinates)

Virgibacillus salarius PL25 conjugative plasmid contig_11 (74,025 bp)
 GC = 31.2% (chromosome 36.8%, $\Delta = -5.6\%$) — strong HGT signature
 geNomad plasmid score = 0.989 • MOB-suite typing: novel (no canonical relaxase/MPF)
 M23 peptidase (PL25_00078) embedded in conjugation operon; closest characterised relative: *O. contaminans* (66.6% protein identity)

Position on contig_11 (bp)
