

a Overlay of M23 catalytic-site residues — all five proteins superposed on PL25_M23 (residues 205-330)

PL25_M23
(this study, AF2)

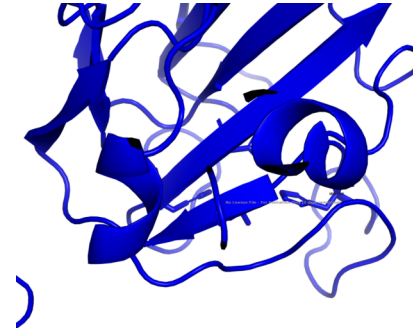

Lysostaphin
(PDB 4QPB)

LytM
(PDB 4ZYB)

ALE-1
(AF2, O05156)

CwIP-clipped
(AF2)

b Per-protein close-ups of the canonical HxxxD + HxH Zn²⁺-binding residues. Side chains shown as sticks; residue numbering as in the respective parent structure.
